

Jacinto de Matos

SENIOR PRODUCT DESIGNER

London | 07837 777574 | jjmatos@hotmail.com | LinkedIn | casestudies-ten.vercel.app | Portfolio password: 1@345

Strategic product designer with 15+ years of experience shaping and shipping customer-facing products across retail, fintech, mobile learning and connected devices. I combine behavioural insight, systems thinking and commercial judgement to simplify complex journeys, define focused MVPs and align product, engineering and business teams around measurable outcomes.

Selected impact: +£1.2m projected annual revenue · 5-minute faster weekly shop · churn below 20% · 62 NPS

EXPERIENCE

Waitrose & Partners | Senior Product Designer

Oct 2023 - Present | London

- **Commercial growth:** Led interaction and content-hierarchy improvements to product detail pages, increasing add-to-trolley by 2.2% and supporting a projected +£1.2m annual revenue impact.
- **Personalised commerce:** Designed and validated QuickShop, reducing the average weekly shop from 26 to 21 minutes and increasing average order value by 12% among infrequent shoppers.
- **Product strategy:** Shaped a prediction-first Shopping Lists proposition that converts typed, pasted or photographed intent into a reviewable draft trolley, balancing automation with customer control.
- **Strategic prioritisation:** Challenged a 12-month bespoke Cellar registration build and proposed an existing-account route that cut expected delivery by more than 50%, freeing capacity to bring Order History into scope.
- **Zero-to-one delivery:** Owned the end-to-end design of personalised Meal Plans, navigating dietary, serving-size and technical constraints from discovery through launch.

PrimaryBid | Senior Product Designer

Jun 2022 - Oct 2023 | London

- **Regulated product design:** Owned responsive IPO investment and onboarding journeys, translating KYC, compliance and transaction requirements into clear, high-trust customer experiences.
- **Operational systems:** Redesigned a broker dashboard to improve complex data visibility, information architecture and decision-making for institutional users.
- **Design leadership:** Established scalable interaction patterns across customer and broker products, mentored two designers and handed over an IPO design system for continued team ownership.

Kaizen Languages | Founding Product Designer

Jul 2019 - Jun 2022 | London

- **Product direction:** Defined the mobile product vision and owned end-to-end design across native iOS and Android, from research and strategy through prototyping, testing and delivery.
- **Retention and activation:** Redesigned onboarding, streaks and progression mechanics, reducing churn to below 20% and improving early retention.
- **Learning innovation:** Redirected roadmap investment towards novice learners and designed an interactive hiragana and katakana writing experience, achieving 62 NPS and increasing lesson completion.
- **Founding systems:** Built the design system and reusable learning patterns needed to scale consistent experiences across mobile and web.
